

Odor Control Manhole Insert

Scope: Where indicated on the plans an Odor Control Manhole Insert shall be placed between the manhole frame and lid.

Spec: Manhole Insert and Canister shall be HDPE ordered specifically to fit specified manhole frame and cover by submitting order form and drawing of casting to manufacturer. Insert shall have seal attached to outer ring to seal between frame and insert. Canister shall be vented on bottom to allow H₂S to rise into carbon bed and eliminate H₂S odor. Canister shall be filled with Darco Carbon specially formulated to remove H₂S from air in MH.

Manufacturers: Odor Control Specialties, N. Kansas City MO, ph 877-279-4027
